- [Learn more about this recall](#)

Description: Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has determined that on certain Model Year ("MY") 2016-2021 CLA-Class, GLA-Class, GLE-Class, GLS-Class, SLC-Class, A-Class, GT-Class, C-Class, E-Class, S-Class, CLS-Class, SL-Class, B-Class, GLB-Class, GLC-Class, and G-Class vehicles (117, 118, 156, 166, 167, 172, 177, 190, 205, 207, 213, 217, 218, 222, 231, 238, 242, 247, 253, 257, 290, 292, and 463 platform), the software design of the communication module may fail to communicate the correct vehicle's location for the emergency call system (eCall) in the event of a crash. If there is a drop of the power supply to the communications module during a crash, the automatic eCall system may register the location of the vehicle's last ignition cycle, rather than its location at the time the eCall system is activated. Emergency responders may be dispatched to an inaccurate vehicle location,

increasing the risk of injury following a crash. Nevertheless, the other functions of the automatic and manual emergency call function are not affected by this issue. Either an authorized Mercedes-Benz dealer or an over-the-air ("OTA") update will update the software of the communication module for the automatic emergency call system on the affected vehicles.

If there is a drop of the power supply to the communications module during a crash, the automatic eCall system may register the location of the vehicle's last ignition cycle, rather than its location at the time the eCall system is activated. Emergency responders may be dispatched to an inaccurate vehicle location, increasing the risk of injury following a crash. Nevertheless, the other functions of the automatic and manual emergency call function are not affected by this issue.

Remedy: Either an authorized Mercedes-Benz dealer or an over-the-air ("OTA") update will update the software of the communication module for the automatic emergency call system on the affected vehicles. All customers will be mailed recall notification letters as required under federal regulations. For vehicles with a "Mercedes Me" subscription service, the software update will be performed OTA and so a dealer visit is not required. For vehicles without a Mercedes Me subscription service, the notification letter will advise the customer that they may opt out of the OTA update and visit an authorized Mercedes-Benz dealer to have the update performed. If the customer does not opt out within the specified period, the update will be performed OTA with the vehicle thereafter. Depending on conditions such as network coverage and consistency of the data connection, if the OTA update cannot be successfully completed, the customer will be notified and advised to visit an authorized dealer to have the update performed. Customers who subscribe to the Mercedes Me service may check the status of the update through the associated website and/or through the Mercedes Me App. If the vehicle is subscribed to the Mercedes Me Connect services, the current status of the remote software update will be listed on the Mercedes Me connect webpage under "Software Update". Further information regarding software updates can be found in the Operator's Manual.

Glossary

CARFAX Well Maintained - Regular Oil Changes

CARFAX identifies a "Well Maintained - Regular Oil Change" vehicle as having a regular oil change history when all its recommended oil changes, based on the vehicle's maintenance schedule, have been reported to CARFAX. CARFAX uses the manufacturer's schedule and assumes normal driving conditions. When an oil change schedule is not available, CARFAX may analyze reported service events to determine what is typical for the same make and model vehicle. Dealers and service shops may publish different recommended service schedules.

Failed Emissions Inspection

The emissions check performed during a vehicle inspection indicated the vehicle was emitting more than allowable emissions standards and/or had missing or modified parts. Repeated failed emissions records can indicate engine problems and CARFAX recommends you have the vehicle inspected.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
