Audi

**Manufacturer Safety Recall issued**

- NHTSA #21V078
- Recall #69BV AIRBAG CONTROL MODULE PROGRAMMING
- Status: Remedy Available
- Locate an authorized [Audi dealer](#) to obtain more information about this recall
- [Learn more about this recall](#)

**Description:** Investigations have found that the second stage of the dual-stage airbag may be activated too soon after stage 1 in certain cases in a very specific, low speed front crash scenario (26 km/h, full frontal). This scenario was not properly accounted for in the airbag inflation parameters of the airbag control module. Audi has decided that the affected vehicles may not fully comply with a section of FMVSS208/CMVSS 208, Occupant crash protection. During conformity-of-production testing using unbelted, out of position 6-year-old test dummies in the front passenger seating position, the dummy instrumentation recorded a "Normalized neck injury criteria" (Nij) of 1,01 in position 2 (dummies chest on the instrument panel) which slightly exceeds the permitted value of 1,00. Although it is unsafe and strongly inadvisable for a child occupant to ride unsecured in the front passenger seat, a child in that position at the time of a crash necessitating air bag deployment may be subject to an increased risk of injury.

**Remedy:** Update parameters of the airbag control module.

Audi

**Manufacturer Safety Recall issued**

- NHTSA #22V516
- Recall #20DR FUEL PUMP
- Status: Remedy Not Yet Available
- Locate an authorized [Audi dealer](#) to obtain more information about this recall
- [Learn more about this recall](#)

**Description:** A component of the fuel delivery module inside the fuel tank may break while operating the vehicle. The fragments can damage the sealing membrane in the pressure regulator. This may lead to a failure of the fuel delivery module and the instrument cluster will display the Malfunction Indicator Light (MIL). In rare cases and under certain circumstances, however, there may be a sudden loss of engine power or the vehicle may break down without a warning appearing beforehand. A fuel leak due to this failure can be ruled out.

**Remedy:** REPAIR NOT YET AVAILABLE

## Glossary

### First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

### Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

### Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

### Repossession

When a repossession occurs a vehicle owner fails to make loan payments, and the financial institution holding the title takes possession of the vehicle.

### Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
