<div style="border: 1px solid blue; padding: 5px;"> <b>Description:</b> The Integrated Brake (IB) system may not have been produced by the supplier according to specifications. If the IB system was not functioning properly, a warning lamp         </div>								

and message will be displayed in the instrument cluster.

In some cases, there will be a reduction in power assist braking, which could lead to an extended stopping distance and increase the risk of a crash. The Antilock Brake System (ABS) and Dynamic Stability Control (DSC) system may not function, which could also affect braking performance as well as vehicle handling and control. However, fully mechanical braking is not affected and, if the IB system is not functioning properly, the parking (emergency) brake will be automatically activated to aid in braking performance and help maintain vehicle stability and control.

**Remedy:** The Integrated Brake (IB) system will be replaced for free by an authorized BMW center which should take several hours.

## Glossary

### Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.
